Timeline

Date

Details

1814 Born in Glasgow. Educated in Glasgow.

1840 Exhibited map and model of Arran at British Association.

1841 Published "Geology of Arran".

Joined Survey as Assistant Geologist.

1846 "On the denudation of South Wales and adjacent counties of England".

- 1848 Appointed to Chair of Geology at University College. London.
- 1849 Elected F.R.S.
- 1851 Appointed to Professorship of Geology in Royal School of Mines.
- 1856 President of Geological Section, British Association at Cheltenham. Address: "On breaks in succession of British rocks".
- 1857 Deputed by Geological Society to American Association for Advancement of Science. Visited Canada and North States with Logan and Hall.
- 1862 President of Geological Society, elected Knight of the Order of St. Maurice of St. Lazarus. Paper to the Geological Society "On Glacial origin of certain lakes in Switzerland."
- 1866 LL.D. (Edinburgh).
President of Geological Section, British Association. Geological map of the British Isles and "On the physical geology and geography of Great Britain" published.
- 1867 Appointed Director of England and Wales Survey.
"The geology of North Wales".
- 1871 Appointed Director-General.
Wollaston Medal.
- 1879 Royal Medal of Royal Society.
- 1880 President of British Association at Swansea. Address: "The recurrence of certain phenomena in geological time".
- 1881 President of the Geology Section, British Association "The origin and progress of present state of geology".
Resigned from Survey, December 31st.
Knighted December 7th.
- 1891 Died December 9th.

Andrew Crombie Ramsay as Director General of the Survey

Extract from: From: Wilson, H.E. Down to earth - one hundred and fifty years of the British Geological Survey. Edinburgh:Scottish Academic Press, 1985. [In all directions: developments under Sir Henry's fourteen successors In all directions: developments under Sir Henry's fourteen successors]

Murchison died in harness at the age of 79 in 1871 and was succeeded by the faithful Ramsay, who had carried most of the administrative load for the last sixteen years. Ramsay's command was reduced by the removal of the Royal School of Mines which was to be governed by a Council of the Professors, though Ramsay continued to lecture in the School for a further five years and was presumably on the governing body. His immediate concern, however, as Director-General, was the Survey, the Museum of Practical Geology, and the Mining Records Office. In the first it can be fairly said that he set the pattern which was to be followed for almost a century — primary mapping on the six-inches to one mile scale and publication of maps on the one-inch scale, with six-inch publication in the coalfields — spurred on presumably by the Coal Commission.

The zest for map publication, at the expense of the explanatory memoirs which should have accompanied them, is perhaps the major criticism we can make of Ramsay's term as Director General. Only in Ireland did Jukes and his successor, Hull, make sure that their men 'wrote-up' their notes before moving on to pastures new, and every one-inch sheet in Ireland has an accompanying 'Explanation' — some better than others but all at least useful.

Apart from Hull in Dublin, Ramsay had two other Local Directors — W.H.Bristow, who seems to have been a fairly solid, not to say stolid, citizen and Archibald Geikie who since 1867 had been Director in Edinburgh. Geikie, apart from the local Directorship, was the first Professor of Geology in the University of Edinburgh and, though an able geologist, was for thirty years undoubtedly the most unpopular man in the Survey. When Ramsay retired in 1881 Geikie (1835-1924) was appointed Director-General and moved to London.
