

Gaster (1924, 1927, 1929, 1932, 1937, 1941, 1944) - *Micraster cortestudinarium* Zone

From Earthwise

[Jump to navigation](#) [Jump to search](#)

Biostratigraphical correlation: Equates with an interval from within the top of the *S. plana* Zone to between the top of the *M. cortestudinarium* Zone and the basal part of the *M. coranguinum* Zone of current usage. Gaster therefore followed Rowe's interpretation of this zone rather than that of Griffith & Brydone (1911) (Wood, WH/95/31R).

Lithostratigraphical correlation: Equates with the upper part of the Lewes Nodular Chalk Formation and possibly basal part of the Seaford Chalk Formation of southern England.

Age: Latest Turonian & Coniacian
