

Griffith & Brydone (1911); Brydone (1912) - abundant *O. pilula* Subzone

From Earthwise

[Jump to navigation](#) [Jump to search](#)

Biostratigraphical correlation: Equates with an interval from within the *E. depressula* Subzone to just below the top of the Subzone of abundant *O. pilula* of current usage (Young & Lake, 1988).

Lithostratigraphical correlation: Equates with the upper part of the Newhaven Chalk and, locally, the basal part of the Culver Chalk Formation of southern England.

Age: Campanian
