

OR/13/001 Glossary

From Earthwise

[Jump to navigation](#) [Jump to search](#)

DTM Digital Terrain Model — Model of surface of the solid Earth (generally the boundary between geosphere and atmosphere or hydrosphere). This is traditionally derived from OS contours and spot heights and should therefore exclude all buildings, trees, hedges, crops, animals etc. Sometimes also referred to as 'bald earth' models.

Envelope Defined here as the extent of a geological deposit in plan view (2D): forming a distribution map of the particular unit, a presence — absence map.

GSI3D Geological Surveying and Investigation in 3D.
