

Pulchellus - pulchellus Zone

From Earthwise

[Jump to navigation](#) [Jump to search](#)

Definition: The zone equates with the interval between the first and last occurrences of *Trigonosemus pulchellus*, and is probably only partly represented in the Norfolk succession, since it equates with the youngest exposed chalk (Johansen & Surlyk, 1990).

Biostratigraphical correlation: The zone equates with the highest part of the exposed *B. occidentalis* Zone of the standard macrofossil biozonal scheme.

Lithostratigraphical correlation: The zone equates with the Beacon Hill Grey Chalk Member (Johansen & Surlyk, 1990).
