Thin Section Colouring Book

By Jane Robb

This Thin Section Colouring Book is for any amateur geologist or student wishing to be inspired by the beautiful world of geological thin sections, or wanting to brush up on their optical microscopy! Even if you don't know much about thin sections, use this book to get to grips with some of the basic, and enjoy colouring in the hand-drawn images.

The book was drawn, designed and written by Jane Robb, using thin section images from [BGS Britrocks](#).

You can download the full book from the [Google Drive](#). Happy colouring!

If you are a young geologist looking for other free resources for download to inspire you, check out [Rocks in Your Eyes](#), also by Jane Robb.
